

TrakSafe Mini

Smartrak's compact and discrete TrakSafe Mini safety device provides people who have experience in at risk or uncomfortable situations the confidence to live independently every day knowing emergency support is only a button press away if they need it.

The integration with Smartrak's next-generation tracking software, instantly alerts emergency response representatives and reveals the location of the person in need through its advanced mapping technology.

The TrakSafe Mini is equipped with an advanced location positioning system, enabling GPS satellite reception to provide an accurate location position, even in rough urban environments.

Benefits

- ✓ Remove the fear of being alone and feel safer in the community
- ✓ Feel more at ease about relatives or loved ones at risk living or working independently
- ✓ Trust that the discrete duress activation won't escalate a potentially violent situation or crime
- ✓ Know it's easy to use with one push of a button

How it Works

- ✓ Connects to Smartrak EyeQ via cellular communication
- ✓ Plots the location of the user on the EyeQ map at 2 minute intervals while the person is moving. (Polling stops when the device is stationary)
- ✓ Raises an alert on the EyeQ map when the user presses the emergency button
- ✓ Sends an email or SMS message to alert specified recipients
- ✓ Alert acknowledgement assures the user that the signal was successfully transmitted (acknowledged as a vibration plus flashing LED lights)

Key Features

- ✓ Able to work on cellular networks in Australia or New Zealand
- ✓ Emergency alerts can be forwarded to an allocated monitoring centre and sent by SMS and email
- ✓ Compact and lightweight housing
- ✓ Wide operating temperature range
- ✓ Ultra-low power consumption
- ✓ Provides accurate alert location information available for secure viewing via a web browser on computer or mobile device
- ✓ At least 16 hours battery life based on the device being active 50% of the time
- ✓ One way voice for audio monitoring from up to two authorised numbers
- ✓ Simple three button functionally

Accessories

- Micro-USB charging cable (for use with a USB car/wall power adapter or computer).
- Standard 240v wall adapter.
- Lanyards and keychains are also available upon request.
