

# Garmin DRIVESMART™

Smartrak™ is pleased to add the Garmin DriveSmart™ to its suite of TrakWise™ fleet and asset management solutions. The DriveSmart™ is fully integrated with EyeQ™, the Smartrak™ Visual Intelligence system, allowing two-way communications between the driver and the map site administrator.

Not only will the DriveSmart™ show you how to get to your destination the quickest, it also shows upcoming landmarks and milestones along your route, without leaving the map view.

The DriveSmart™ encourages safer driving and increases situational awareness of the drives. It communicates in the event of sharp curves, speed changes, railroad crossings, animal crossings and more. For longer drives, a fatigue warning suggests break times and potential rest areas after more than 2 hours of driving without stopping.

## Benefits

- ✓ Hands-free calling
- ✓ Call, text and calendar notifications
- ✓ Pair with Bluetooth Low Energy (BLE)
- ✓ Prevention of risk related to fatigue
- ✓ Driver Alerts: Assist with real time on-road driving conditions
- ✓ Speed limit control through visual and audible triggers
- ✓ Connects to 'Smartphone Link' mobile App for weather and traffic conditions
- ✓ Pre-loaded street maps with lifetime map updates
- ✓ Voice-activated navigation and calling
- ✓ Trip planner
- ✓ Trip log
- ✓ Garmin Real Directions with lane assist, easy to understand driving directions, using recognisable landmarks.

## Smartrak™ and Garmin DriveSmart™:

- ✓ Two way messaging between operator (map user) and vehicle/driver
- ✓ Fleet Management Interface integration
- ✓ Ability to remotely add-remove jobs/stops to route

## Key Features

- ✓ Bright 5.0-inch GPS navigator with dual orientation, pinch-to-zoom display
- ✓ Detailed maps with free lifetime map updates
- ✓ Map and software updates via WiFi
- ✓ Bluetooth® hands-free calling and voice-activated navigation
- ✓ Driver alerts for increased awareness, including upcoming sharp curves, school zones, animal crossings and more.
- ✓ Ability to send incident notifications to person of your choice
- ✓ Available in 51/61 LMT-S
- ✓ Also supports the Garmin Drive Assist™ Model which supports audio and image recording

- ✓ After acceptance Garmin will provide most efficient route
- ✓ Provides status updates on vehicle: location, progression through list of jobs, completion
