

TrakWise Remora

Non-powered asset tracking device

Easy Asset Management

GPS tracking is great for monitoring the location and movement of vehicles but how do you find and keep track of non-powered assets? Smartrak has integrated the Remora non-powered asset tracking device into EyeQ, its mapping and reporting software, making it easy to manage trailers, containers, generators, and any other type of non-powered asset.

Benefits

- ✓ Keep track of your high value assets
- ✓ Stop spending time trying to locate critical equipment
- ✓ Quickly identify if you have what you need at a depot or job site
- ✓ Engage recovery mode to find an asset if missing or in an unknown location

How it Works

- ✓ Locate your assets on a map
- ✓ Receive alerts when the asset is moved outside a specified location (geofence)
- ✓ Monitor battery life with reports showing percentage of battery life remaining and expected depletion date
- ✓ Rely on the system to provide an alert when battery life is getting low
- ✓ Remotely set recovery mode to begin live tracking

Key Features

- ✓ Rugged and robust; designed with an IP67 rating to survive bumps, knocks, and weather exposure
- ✓ Adaptive tracking technology sends an update every 2 minutes when it is moving and reduces messaging to every 12 hours when stationary to preserve battery life
- ✓ Location report provides an easy, at-a-glance view of all tracked assets
- ✓ Battery report shows life span of each device and system alerts signal you when new batteries are required
- ✓ Simple do-it-yourself installation
- ✓ Ultra-long battery life

Includes:

3G cellular connection
4 C-cell size Alkaline batteries
Anti-tamper magnet (optional)
